The ice left the Kennebec or Fast Day, much later than the average. For the past hundred years, there have been but five aprings when the river has been closed to navigation by ice at a later date than this. In 1785 the ice went out April 24; in 1913, April 25. The earliest years of opening were: 1806, March 15; 1871, March 12; 1878, March 15. Since 1785 the ice has left the river in March, 28 times. The average date would be about april 10th. The snow and ice left so gradually, this year, that no admage has been done on the river, and the pitch of water at no time has approached anything like a freshet.
